## RELEVANT EXPERIENCE

### American Academy of Physical Medicine and Rehabilitation (AAPM&R)

#### CHICAGO, IL

AAPM&R partnered with ECG on the PM&R Physician Compensation Survey to provide market-specific physician compensation and production benchmarks as well as detailed information on physician demographics, practice characteristics, clinical activities, compensation plan structure and incentives, and benefits from over 1,150 physiatrists. This survey is the largest national data set of physiatrists and includes data for subspecialty areas not found in other industry surveys, including pain medicine, pediatric rehabilitation, and neuromuscular medicine.

### Infectious Diseases Society of America (IDSA)

#### ARLINGTON, VA

IDSA engaged ECG to assist and advise on the Board of Directors' initiative to develop a strategy and implementation plan for increasing ID physician compensation. We developed and administered a compensation and deployment survey to IDSA members to identify compensation opportunities for ID-trained physicians, resulting in the IDSA's Physician Compensation Initiative, for which ECG continues to provide consulting guidance and project management. ECG has also helped develop dozens of dynamic physician compensation-related educational opportunities for IDSA's membership.

### American Society of Colon and Rectal Surgeons (ASCRS)

#### CHICAGO, IL

ASCRS partnered with ECG on the ASCRS Physician Compensation Survey, which reported data from 788 colorectal surgeons, making this survey the largest national data set available in the industry for this specialty. The detailed market report contains benchmarks for physician compensation and production benchmarks and a comprehensive clinical and practice profile for colorectal surgeons, including analyses of gender disparities, call coverage requirements, and work standards.

### The American College of Rheumatology (ACR)

#### ATLANTA, GA

ECG is partnering with ACR to promote the training and sustainment of the rheumatology provider workforce through fellowship program assistance, development of recruitment/retention resources, professional development support for referring PCPs, advocacy with payers, and creation of interventions to expand access to rheumatologic care, particularly in underserved areas. ECG has also facilitated several surveys of ACR program directors and faculty to provide market compensation and production benchmarks and a profile of academic divisions and their faculty, resulting in the most comprehensive national data set available in the industry.

## The Courage to Change Healthcare.®

Since our founding, ECG has kept pace with an ever-evolving industry, steadfast in our commitment to and passion for healthcare. Together with our clients, we're making healthcare more accessible, sustainable, and effective for the patients and communities they support.
